
STATEMENT OF HEALTH & SAFETY POLICY

The health and safety of our employees is of paramount importance.

It is the intent and policy of Artic Building Services and all of its management to give the safety, health and welfare of our employees and all others that come into contact with our operations (including the general public where appropriate), the highest priority to ensure, as far as is reasonably possible, that adequate protection is provided from the risk of accident or injury. We will provide all necessary information and give instruction and training to achieve this aim. Appropriate, preventative and protective measures are, and will continue to be implemented following the identification of work-related hazards and assessment of the risk associated with them.

The Company recognises and accepts its responsibilities as an employer to provide, so far as is reasonably practicable, safe and healthy work places and working environment for all its employees. The Company will comply with the requirements of the Health and Safety at Work etc. Act 1974, supporting Regulations and Approved Codes of Practice. We recognise the importance of employer/employee consultation on matters of health and safety and the value of individual consultation prior to allocating specific health and safety functions.

To aid the achievement of these ends the company enlists the support and co-operation of all employees.

Concern for health and safety ranks equally with all other management responsibilities and is seen to be an indication of effective working.

The allocation of duties for safety matters and the persons appointed with particular responsibilities will be identified within the Company Health and Safety Management System and in associated specific documents.

The objectives of the Health and Safety Management System can only be achieved with the support and co-operation of employees and all other persons who work within the company. Artic Building Services would request this full support.

The Health and Safety Management System will be periodically reviewed and amended as appropriate to reflect changes in the nature of activities of the company and to review the effectiveness of the implementation of this document.
